

Q1 2015 STOCKHOLDER PRESENTATION

APRIL 28, 2015

SAFE HARBOR STATEMENT

SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This presentation contains statements that, to the extent they are not recitations of historical fact, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Reform Act"). All such forward-looking statements are intended to be subject to the safe harbor protection provided by the Reform Act. Actual outcomes and results could differ materially from such forecasts due to the impact of many factors beyond the control of American Capital Agency Corp. ("AGNC" or the "Company"). All forward-looking statements included in this presentation are made only as of the date of this presentation and are subject to change without notice. Certain important factors that could cause actual results to differ materially from those contained in the forward-looking statements are included in our periodic reports filed with the Securities and Exchange Commission ("SEC"). Copies are available on the SEC's website at www.sec.gov. AGNC disclaims any obligation to update such forward-looking statements unless required by law.

The following slides contain summaries of certain financial and statistical information about AGNC. They should be read in conjunction with our periodic reports that are filed from time to time with the SEC. Historical results discussed in this presentation are not indicative of future results.

* As of March 31, 2015 unless otherwise indicated

1. As of April 15, 2015
2. "Net Asset Value" and "Total Equity Capital" are net of the 8.000% Series A Cumulative Redeemable Preferred Stock ("Series A Preferred Stock") liquidation preference of \$173 million and the 7.750% Series B Cumulative Redeemable Preferred Stock ("Series B Preferred Stock") liquidation preference of \$175 million
3. Each depositary share outstanding represents a 1/1,000th interest in a share of Series B Preferred Stock

Q1 2015 HIGHLIGHTS

- ◆ **\$0.46 Comprehensive Income per Share, Comprised of:**
 - ✓ \$(0.73) net loss per share
 - ✓ \$1.19 other comprehensive income (“OCI”) per share
 - Includes net unrealized gains on investments marked-to-market through OCI
- ◆ **\$0.70 Net Spread and Dollar Roll Income per Share, Excluding Estimated “Catch-Up” Premium Amortization Cost ¹**
 - ✓ Includes \$0.16 per share of dollar roll income associated with a \$7.0 B average net long position in forward purchases and sales of Agency MBS in the “to-be-announced” (“TBA”) market ²
 - ✓ Excludes \$(0.05) per share of estimated “catch-up” premium amortization cost due to change in projected constant prepayment rate (“CPR”) estimates
- ◆ **\$25.53 Net Book Value per Share as of Mar 31, 2015**
 - ✓ Decreased \$(0.21) per share, or -0.8%, from \$25.74 per share as of Dec 31, 2014
- ◆ **\$0.66 Dividend Declared per Share**
 - ✓ 12.4% annualized dividend yield relative to Mar 31, 2015 closing stock price of \$21.33 per share
- ◆ **1.7% Economic Return on Common Equity for the Quarter, or 7.1% Annualized**
 - ✓ Comprised of \$0.66 dividend per share and \$(0.21) decrease in net book value per share

Note: Per share amounts included throughout this presentation are per common share, unless otherwise indicated

1. Represents a non-GAAP measure. Refer to the supplemental slides later in this presentation for a reconciliation and further discussion of non-GAAP measures
2. Dollar roll income (loss) is based on our net long (short) TBA position and is recognized in gain (loss) on derivative instruments and other securities, net

Q1 2015 OTHER HIGHLIGHTS

- ◆ **\$66.2 B Agency MBS Investment Portfolio as of Mar 31, 2015**
 - ✓ Includes \$4.9 B net long TBA mortgage position as of Mar 31, 2015
- ◆ **6.4x “At Risk” Leverage as of Mar 31, 2015^{1,2}**
 - ✓ 5.8x leverage excluding net long TBA mortgage position as of Mar 31, 2015
- ◆ **8.4% Portfolio CPR for the Quarter**
 - ✓ 9.8% average projected portfolio life CPR as of Mar 31, 2015
- ◆ **1.53% Annualized Net Interest Rate Spread for the Quarter, Including TBA Dollar Roll Income³**
 - ✓ 1.64% annualized net interest rate spread, including TBA dollar roll income, for the quarter excluding -11 bps of “catch-up” premium amortization cost due to change in CPR estimates

1. Leverage calculated as sum of Agency MBS repurchase agreements (“repo”), net payable/receivable for Agency securities not yet settled, and other debt divided by the sum of total stockholders’ equity less the fair value of investments in REIT equity securities. Leverage excludes U.S. Treasury repo
2. “At risk” leverage includes the components of “leverage,” plus our net TBA position (at cost)
3. Net interest rate spread and TBA dollar roll income calculated as the average asset yield, less average cost of funds (actual and implied). Average cost of funds includes Agency MBS repo, TBA implied cost of funds, other debt and periodic swap interest costs. Cost of funds excludes other supplemental hedges, such as swaptions, U.S. Treasury positions and U.S. Treasury repos

2. Lower balance ("LB") loans defined as pools backed by original loan balances of up to \$150K. Wtd/avg original loan balance of \$97K for ≤15-year and 30-year securities as of Mar. 31, 2015.
3. HARP defined as pools backed by 100% refinance loans with original LTVs ≥ 80%. Wtd/avg original LTV of 109% for ≤15-year and 119% for 30-year securities as of Mar. 31, 2015.
4. WALA represents the weighted average loan age presented in months. Excludes net TBA position
5. Average projected life CPR as of Mar. 31, 2015. Excludes net TBA position
6. Includes \$0.2 B and \$3.7 B of 15-year and 30-year Ginnie Mae MBS, respectively

FINANCING SUMMARY

OUR FINANCING POSITION IS VERY STRONG, WITH SIGNIFICANT ACCESS TO ATTRACTIVE REPO FUNDING ACROSS A WIDE RANGE OF COUNTERPARTIES AND FINANCING TERMS

- ◆ Average repo cost remained unchanged as of Mar 31, 2015 at 0.41%
- ◆ Repo counterparties totaled 34 as of Mar 31, 2015
- ◆ 164 weighted average days to maturity as of Mar 31, 2015, an increase from 143 days as of Dec 31, 2014

Repurchase Agreements ¹

HEDGING SUMMARY

OUR HEDGES ARE DESIGNED TO MITIGATE BOOK VALUE FLUCTUATIONS DUE TO INTEREST RATE CHANGES AND ARE NOT DESIGNED TO PROTECT AGAINST MARKET VALUE FLUCTUATIONS IN OUR ASSETS CAUSED BY CHANGES IN THE SPREAD BETWEEN OUR INVESTMENTS AND OTHER BENCHMARK RATES, SUCH AS SWAP AND TREASURY RATES, WHICH IS THEREFORE A RISK THAT IS INHERENT TO OUR BUSINESS ¹

◆ Our hedge portfolio totaled \$49.4 B and covered 78% of our repo, other debt and net TBA position as of Mar 31, 2015, an increase from 76% as of Dec 31, 2014

✓ **Interest Rate Swaps**

- \$44.9 B notional pay fixed swaps
- Average maturity declined from 5.8 to 5.2 years
- Covered 71% of repo, other debt and net TBA position as of Mar 31, 2015

✓ **Payer Swaptions**

- \$5.2 B notional payer swaptions
- Net decrease of \$1.6 B from prior quarter

✓ **Receiver Swaptions**

- \$0.8 B notional receiver swaptions
- Net decrease of \$3.5 B from prior quarter

✓ **Treasury Securities and Futures**

- \$24 MM net long treasury position market value
- Compared to a \$3.9 B net short treasury position as of Dec 31, 2014

Hedge Portfolio Summary

As of Mar 31, 2015 - \$ in Millions

	Notional/ Market Value 3/31/2015	Duration 3/31/2015 ²	Net Hedge Gains/ (Losses) Q1 2015 ³	Net Hedge Gains/ (Losses) Per Share Q1 2015
Interest Rate Swaps	\$(44,925)	(4.7)	\$(633)	\$(1.79)
Payer Swaptions	(5,200)	(0.6)	(17)	(0.05)
Receiver Swaptions	750	4.4	17	0.05
Treasury Securities	964	26.5	(30)	(0.09)
Treasury Futures	(940)	(6.3)	(20)	(0.06)
Total / Q1 2015 ⁴	\$(49,351)	(3.0)	\$(683)	\$(1.94)
As of Dec 31, 2014 / Q4 2014				
Total / Q4 2014 ⁴	\$(50,110)	(3.3)	\$(937)	\$(2.66)

1. The amount of interest rate protection provided by our hedge portfolio may vary considerably based on our management's judgment, asset composition and general market conditions
 2. Duration is a model estimate of interest rate sensitivity measured in years as of a point in time (see supplemental slides at the end of this presentation for additional information)
 3. Net hedge gains/losses in the table above exclude periodic swap costs (a component of net spread income), TBA dollar roll income/loss and mark-to-market gains/losses on our net TBA dollar roll position
 4. Total duration is expressed in asset unit equivalent

MANAGING DURATION RISK

WE ACTIVELY MANAGE OUR EXPOSURE TO BOTH EXTENSION RISK AND CONTRACTION RISK ¹

Duration Gap Sensitivity ^{2,3}				
As of Mar 31, 2015				
	Rates - 100 bps	Duration 3/31/2015	Rates + 100 bps	Rates + 200 bps
Mortgage Assets: ⁴				
30-Year MBS	1.8	4.0	6.0	7.0
15-Year MBS	1.6	3.1	4.0	4.3
Total Mortgage Assets	1.7	3.6	5.1	5.8
Liabilities, Swaps and Treasuries	(3.5)	(3.4)	(3.3)	(3.3)
Net Duration Gap without Swaptions	(1.8)	0.2	1.8	2.5
Swaptions	0.1	--	(0.2)	(0.3)
Net Duration Gap with Swaptions	(1.7)	0.2	1.6	2.2
As of Dec 31, 2014				
Net Duration Gap with Swaptions	(1.4)	0.5	1.7	2.1

- ◆ Ongoing portfolio rebalancing actions allow us to further mitigate our interest rate exposure

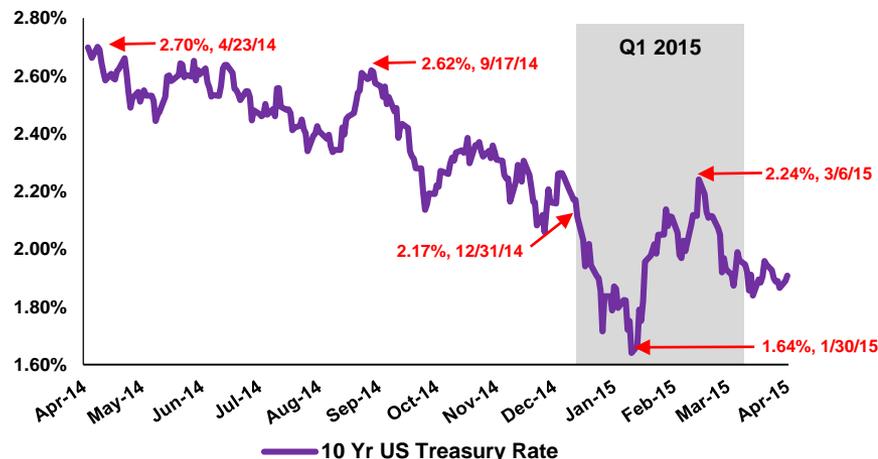

1. Extension risk is the risk that the duration of a mortgage security increases in a rising rate environment and, conversely, contraction risk is the risk that the duration of a mortgage security shortens in a falling interest rate environment
2. Durations are expressed in years. Liability, swap, U.S. Treasury and swaption durations are expressed in asset unit equivalents
3. Duration is a model estimate of interest rate sensitivity measured in years as of a point in time (see supplemental slides at the end of this presentation for additional information). The sensitivity analysis assumes an instantaneous parallel shift in interest rates and, consequently, does not include the potential impact of ongoing portfolio rebalancing actions
4. Mortgage assets include net TBA position. 15-year MBS position includes 20-year fixed rate MBS

INTEREST RATE ENVIRONMENT

GLOBAL INTEREST RATE VOLATILITY HAS INCREASED SIGNIFICANTLY IN RECENT QUARTERS IN RESPONSE TO CENTRAL BANK ACTIONS AND DIVERGENT ECONOMIC GROWTH AND INFLATION OUTLOOKS

10 Year U.S. Treasury Rate

April 21, 2014 – April 21, 2015

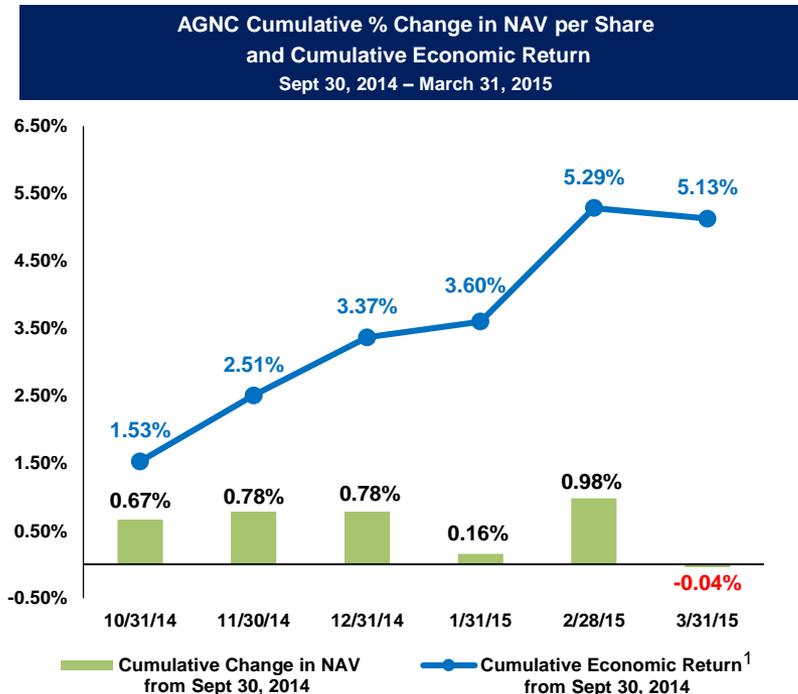

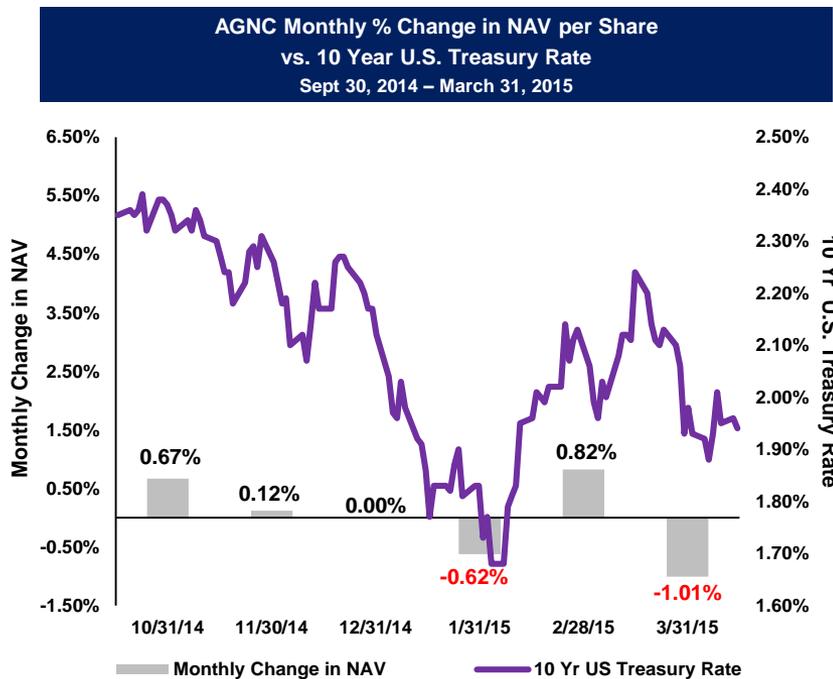

Global Rates

As of March 31, 2015

Yields	1 Year	5 Year	10 Year
Switzerland	-0.89%	-0.40%	-0.07%
Germany	-0.21%	-0.10%	0.18%
France	-0.20%	0.05%	0.47%
Italy	-0.21%	0.54%	1.24%
Japan	0.04%	0.14%	0.40%
United Kingdom	0.23%	1.19%	1.58%
United States	0.20%	1.37%	1.93%

- ◆ Volatility in the currency, commodity, high yield and equity markets has contributed to U.S. Treasury rate volatility
- ◆ We expect interest rate volatility to persist until there is greater clarity on:
 - ✓ Global deflationary pressures versus U.S. inflationary pressures
 - ✓ Global currency weakness and the pace of U.S. economic growth
 - ✓ Divergent expectations between the Fed's rate normalization process and the monetary accommodation provided by most other Central Banks
 - ✓ Low and negative foreign government bond rates versus U.S. Treasury rates
 - ✓ Reduced fixed income liquidity due to Central Bank intervention and increased regulatory requirements
- ◆ We reduced our interest rate exposure and lowered our leverage in response to the current uncertain interest rate environment

AGNC MONTHLY % CHANGE IN NAV PER SHARE VS. 10 YEAR U.S. TREASURY RATE AND AGNC CUMULATIVE ECONOMIC RETURN VS. CUMULATIVE % CHANGE IN NAV

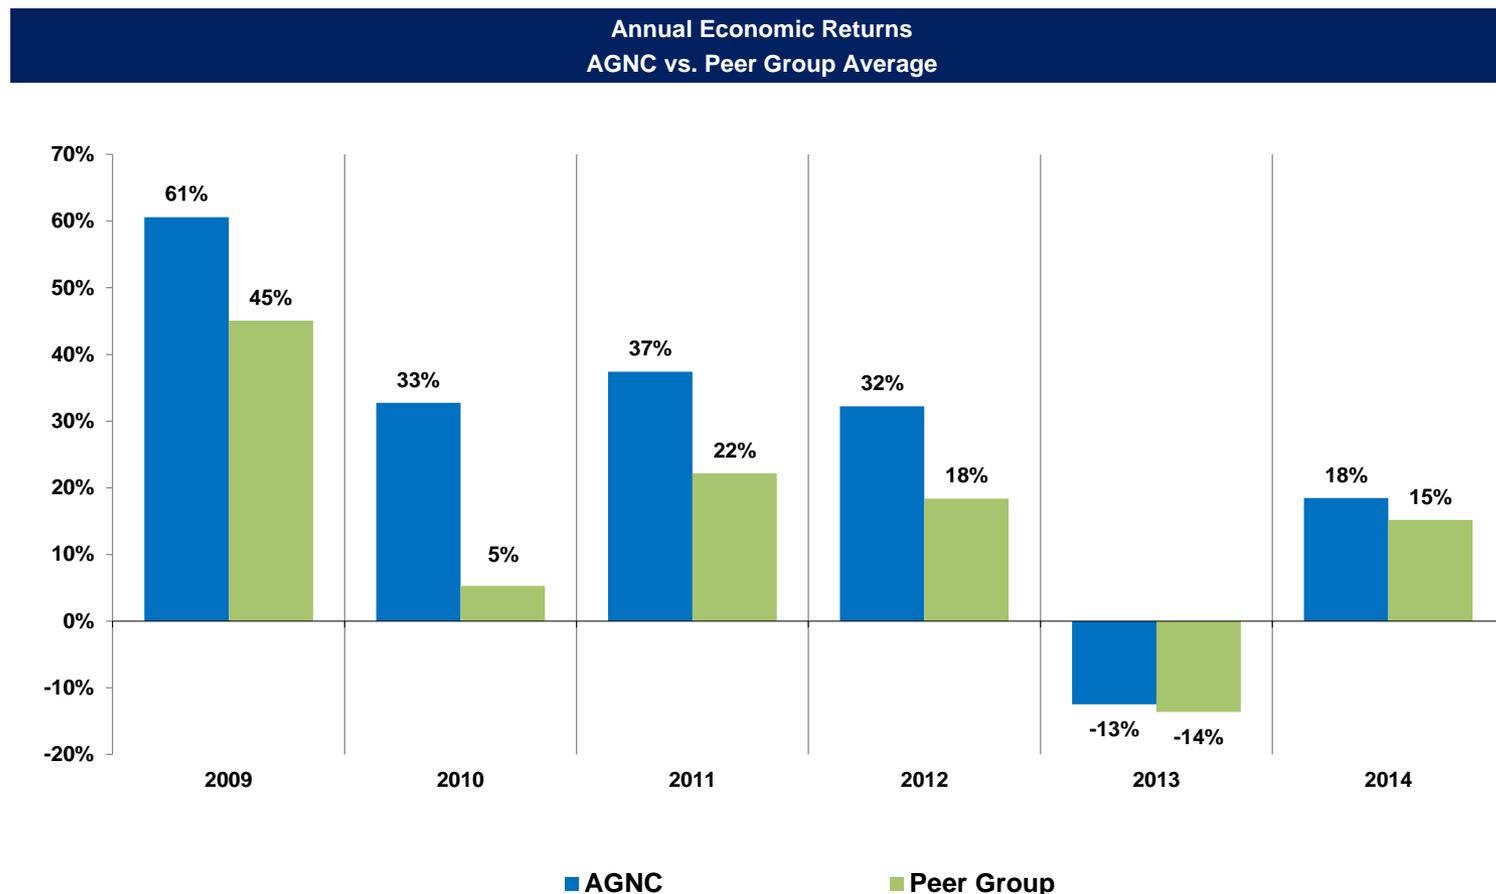

- ◆ **Despite significant interest rate volatility over the past two quarters, AGNC's monthly NAV per share remained relatively stable, while earning a positive economic return of 5.13% (or 10.26% annualized) over the period**

1. Economic return represents the sum of the change in net asset value per common share and dividends declared on common stock during the period over the beginning net asset value per common share

SUPPLEMENTAL SLIDES

AGNC ANNUAL ECONOMIC RETURNS VS. PEER GROUP AVERAGE ^{1,2}

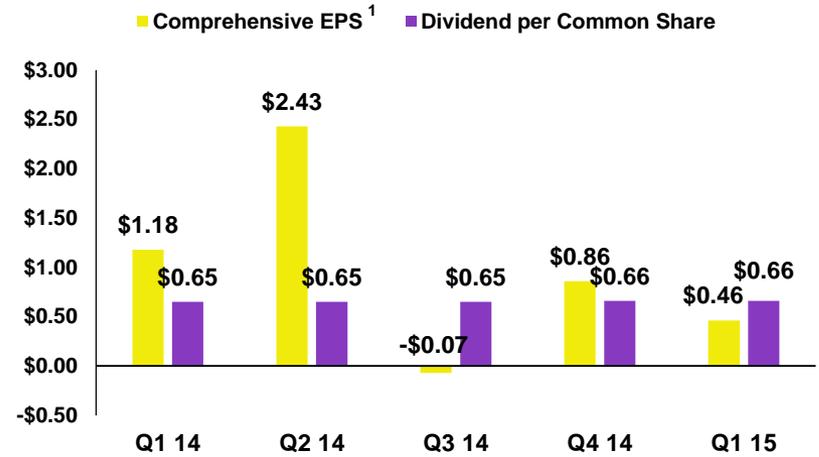

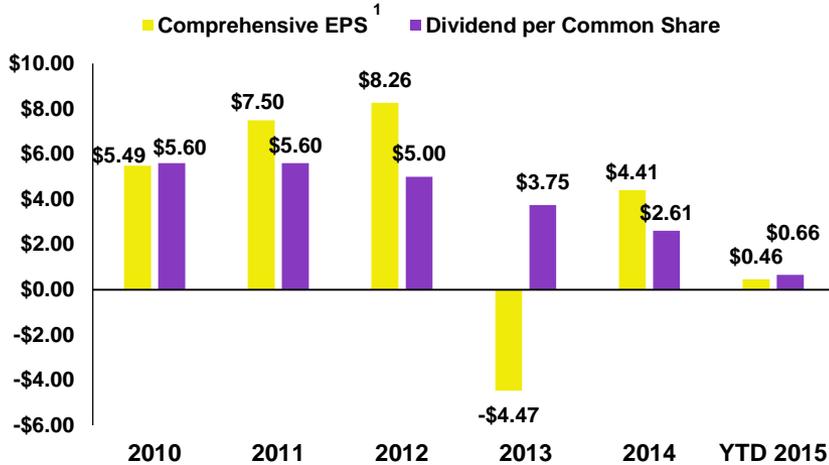

AGNC HAS CONSISTENTLY OUTPERFORMED THE PEER GROUP AVERAGE, DUE IN PART TO AGNC'S ACTIVE APPROACH TO PORTFOLIO MANAGEMENT

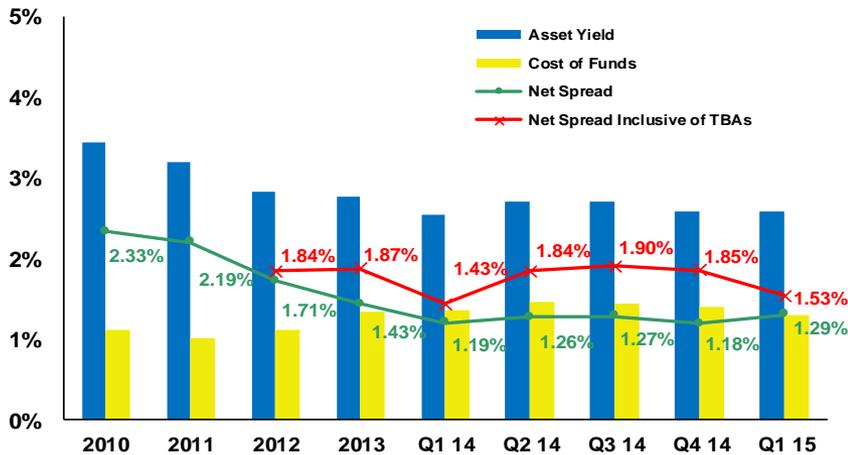

1. Economic return on common equity represents the sum of the change in net asset value per common share and dividends declared on common stock during the period over the beginning net asset value per common share
2. Peer group average consists of HTS, CMO, NLY, ANH, CYS and ARR on an unweighted basis

AGNC HISTORICAL OVERVIEW

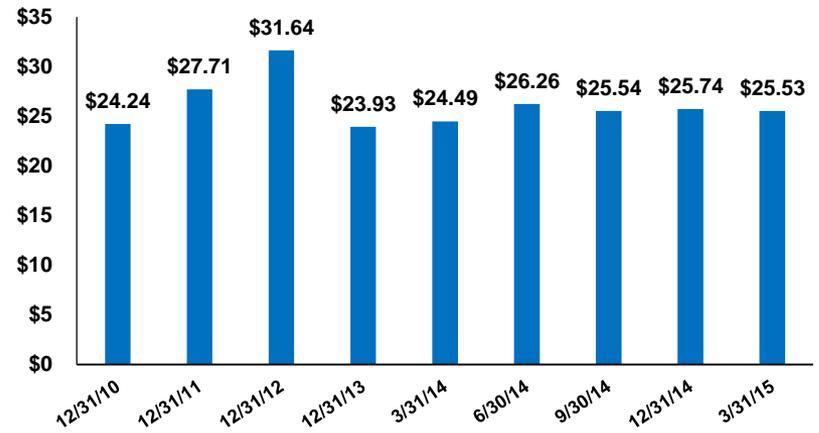

Earnings and Dividends per Common Share

Net Spread²

Net Book Value per Common Share³

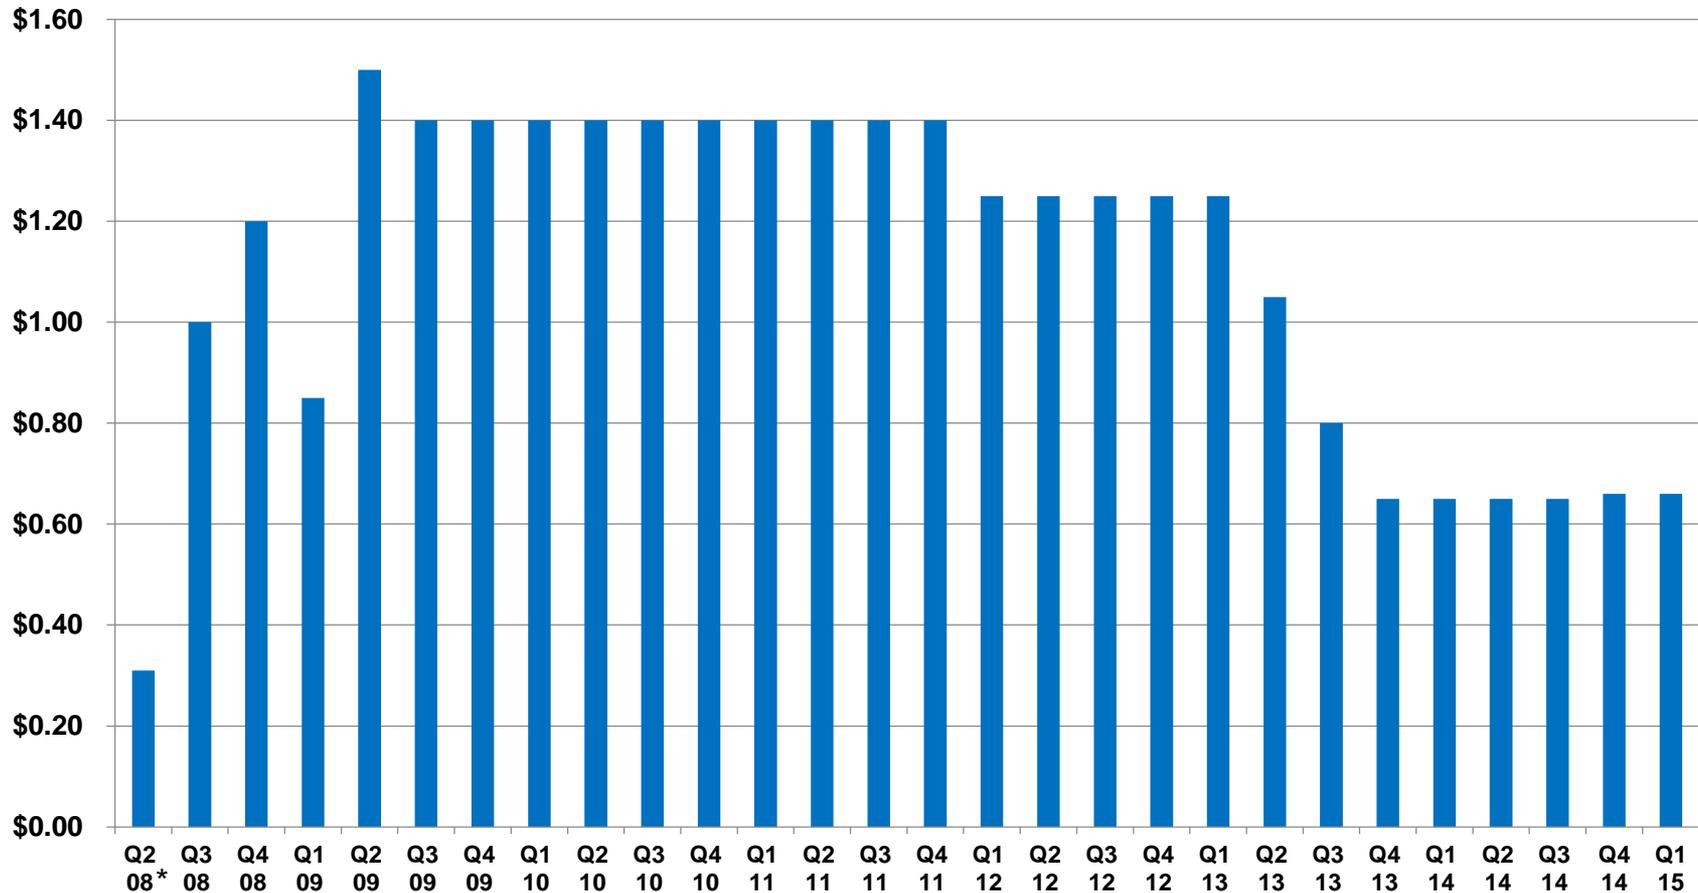

1. Comprehensive earnings per common share is a GAAP measure that consists of net income/loss per common share plus unrealized gains/losses on Agency MBS recognized in other comprehensive income, a separate component of equity
2. Represents average per quarter. Unless noted, excludes net dollar roll income/loss from our TBA mortgage position. Excludes other supplemental hedge costs, such as swaption and short U.S. Treasury costs
3. Net book value per common share calculated as total stockholders' equity, less the Series A and B Preferred Stock liquidation preference, divided by total common shares outstanding

AGNC HISTORICAL OVERVIEW

SINCE INCEPTION AGNC HAS PAID \$5.3 BILLION IN COMMON DIVIDENDS, OR \$30.88 PER COMMON SHARE

Dividends per Common Share by Quarter

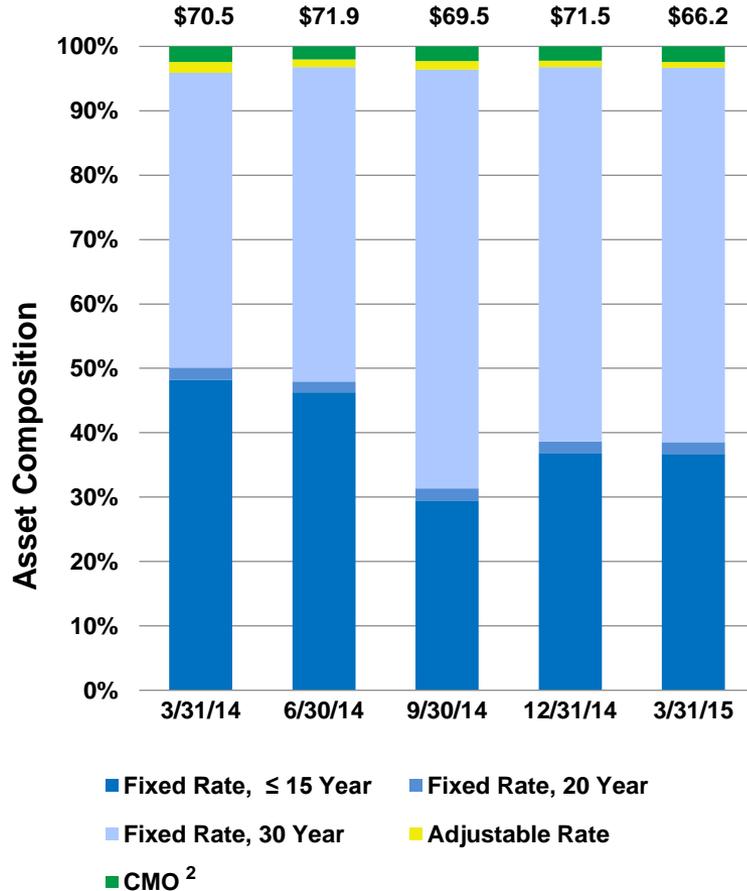

* Reflects the dividend for the shortened "stub" period from the closing of the Company's initial public offering ("IPO") and concurrent private placement on May 20, 2008 through June 30, 2008

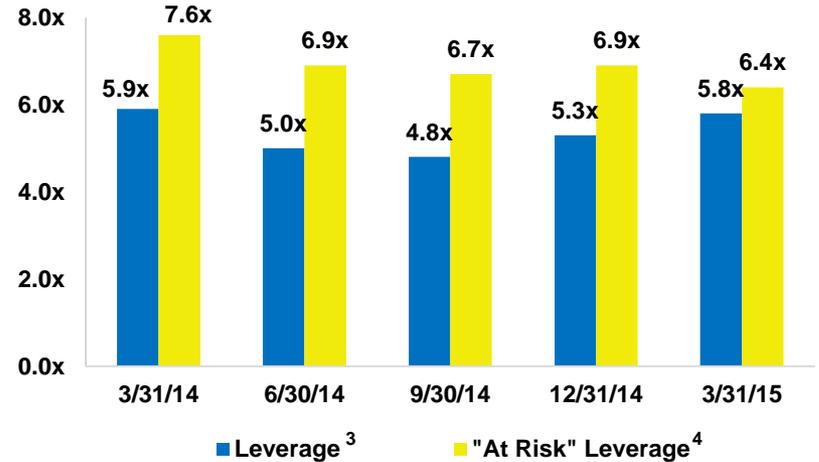

AGNC HISTORICAL OVERVIEW

Portfolio ¹

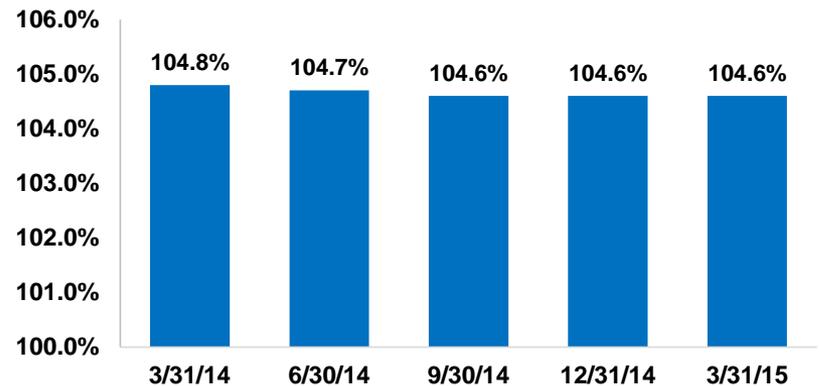

(\$ in Billions)

Leverage

Amortized Cost Basis

1. Amounts include the Company's net TBA mortgage position
 2. Includes interest-only, inverse interest-only and principal-only securities
 3. Leverage calculated as sum of Agency MBS repurchase agreements, net payable/receivable for Agency MBS not yet settled and other debt divided by the sum of total stockholders' equity less the fair value of investments in REIT equity securities. Leverage excludes U.S. Treasury repurchase agreements of \$3.8 B, \$1.9 B, \$1.8 B, \$1.2 B and \$0.1 B as of Mar 31, 2015 and Dec 31, Sept 30, June 30 and Mar 31, 2014, respectively
 4. "At risk" leverage includes the components of leverage plus our net TBA dollar roll position (at cost)

- Table includes non-GAAP financial measures. Please refer to additional information regarding non-GAAP financial measures at the end of this presentation
- We voluntarily discontinued hedge accounting under GAAP as of Sept 30, 2011. Accumulated OCI on de-designated interest rate swaps is being amortized on a straight-line basis over the remaining swap terms into interest expense. All other periodic interest costs, termination fees and mark-to-market adjustments associated with interest rate swaps are reported in other income (loss), net pursuant to GAAP
- Other interest rate swap periodic costs represent periodic interest costs on the Company's interest rate swap portfolio in excess of amortized amounts reclassified from accumulated OCI into interest expense. Other interest rate swap periodic costs exclude interest rate swap termination fees and mark-to-market adjustments on interest rate swaps
- Reported in gain (loss) on derivative instruments and other securities, net in the accompanying income statement

Taxable income determines our minimum REIT distribution requirement. Our “Earnings and Profits” (or “E&P”) determines the character of our dividends for stockholders (i.e., whether our distributions are characterized as dividend income or a return of capital for stockholders). E&P is a tax measure that generally conforms to taxable income; however, the utilization of net capital loss carry forwards does not reduce our current year E&P. Therefore, although our 2015 dividend distributions may exceed our taxable income, they may not exceed our 2015 E&P, and as such our dividend distributions reported to stockholders on Form 1099-DIV for fiscal year 2015 may represent ordinary dividend income for stockholders once the final determination is made after the end of our fiscal year.

Amounts may not total due to rounding

1. Table includes non-GAAP financial measures. Please refer to information regarding non-GAAP financial measures at the end of this presentation
2. Capital losses in excess of capital gains are not deductible from ordinary taxable income, but may be carried forward for up to five years and applied against future net capital gains. As of Mar 31, 2015, \$0.6 B of capital losses were available through Dec 2018

- The wtd/avg coupon on fixed rate securities held as of Mar 31, 2015 was 3.49%, excluding net long TBA mortgage position, and 3.42%, including net long TBA position
- Excluding net long TBA position, total fixed-rate MBS as of Mar 31, 2015 had a par value of \$55,749, market value of \$59,140 and an avg duration of 3.4 years
- Higher quality specified pools include pools backed by orig. loan balances of up to \$150K and HARP securities backed by 100% refinance loans with orig. LTVs ≥ 100%
- Other specified pools include pools backed by: orig. loan balances of > \$150K and ≤ \$175k; HARP securities with 100% refi. loans and orig. LTVs of ≥ 80 and <100%; low FICO loans with a max orig. credit score of 700; loans 100% originated in N.Y. and Puerto Rico; and 100% investor occupancy status loans
- Average MBS cost basis, WAC, Age and CPR exclude net TBA position
- Average WAC represents the weighted average coupon of the underlying collateral
- Actual 1 month annualized CPR published during Apr 2015 for Agency securities held as of Mar 31, 2015
- Duration derived from models that are dependent on inputs and assumptions provided by third parties as well as by our investment team and, accordingly, actual results could differ materially from these estimates. Refer to the supplemental slide at the end of this presentation for additional information
- Includes \$0.2 B and \$3.7 B of 15-year and 30-year Ginnie Mae MBS (at fair value), respectively

REPO COUNTERPARTY CREDIT RISK

OUR REPO FUNDING IS WELL DIVERSIFIED BY COUNTERPARTY AND GEOGRAPHY

- ◆ Repo counterparties well diversified
- ◆ Maintained excess capacity with most of our counterparties
- ◆ Less than 4% of our equity is at risk with any one counterparty
- ◆ Less than 15% of our equity is at risk with the top 5 counterparties

Counterparty Region	Number of Counterparties	Percent of Repo Funding
North America	18	65%
Asia	5	12%
Europe	11	23%
Total	34	100%

	5	0.6%
	6-11	2.0%

Total Exposure	34.7%
Top 5 Exposure	14.2%

Note: All figures as of Mar 31, 2015

1. Excludes \$0.7 B of other debt in connection with the consolidation of a structured transaction under GAAP
2. Counterparty exposure with regard to Agency collateral pledged under repo agreements. Amounts do not include exposure with regard to collateral pledged under derivative agreements, prime brokerage agreements and other debt

HEDGE INSTRUMENTS

OUR PRIMARY OBJECTIVE IS NOT TO ELIMINATE RISK OR TO LOCK IN A PARTICULAR NET INTEREST MARGIN, BUT TO MAINTAIN OUR NET BOOK VALUE WITHIN REASONABLE BANDS OVER A RANGE OF INTEREST RATE SCENARIOS

◆ Interest Rate Swaps

- ✓ \$44.9 B notional pay fixed swap book as of Mar 31, 2015
 - \$3.5 B of swaps added during the quarter
 - 3.1 years average maturity, 1.18% average pay rate as of Mar 31, 2015
 - \$2.3 B of swaps terminated or expired during the quarter

◆ Payer Swaptions

- ✓ \$5.2 B notional payer swaptions as of Mar 31, 2015
 - No payer swaptions added during the quarter
 - \$1.6 B payer swaptions expired for net realized losses of \$15 MM
 - 0.6 year average remaining option term, 7.0 years average underlying swap term

◆ Receiver Swaptions

- ✓ \$0.8 B notional receiver swaptions as of Mar 31, 2015
 - 0.2 year average remaining option term, 6.7 years average underlying swap term
 - \$3.5 B payer swaptions terminated for net realized gains of \$13 MM

As of Mar 31, 2015 (\$ in Millions)

Interest Rate Swaps

DURATION GAP INFORMATION

DURATION GAP IS AN ESTIMATE OF THE DIFFERENCE IN THE INTEREST RATE PRICE SENSITIVITY OF OUR ASSETS RELATIVE TO OUR LIABILITIES AND HEDGES, EXCLUDING THE IMPACT OF NEGATIVE CONVEXITY AND LEVERAGE

- ◆ **Our duration gap was positive 0.2 years as of Mar 31, 2015, compared to positive 0.5 years as of Dec 31, 2014**
- ◆ **The duration of our asset portfolio was 3.6 years as of Mar 31, 2015, compared to 4.1 years as of Dec 31, 2014**
- ◆ **The duration of our liability and hedge portfolio was negative 3.4 years as of Mar 31, 2015, compared to negative 3.6 years as of Dec 31, 2014**

(\$ in Billions, Duration in years)	Mar 31, 2015		Dec 31, 2014

Payer Swaptions	(5.2)	-0.6	(6.8)	-0.9
Receiver Swaptions	0.8	4.4	4.3	2.0
Treasury Securities	0.9	26.5	(2.9)	-1.7
Treasury Futures	(0.9)	-6.3	(0.9)	-6.3
Total ³		-3.4		-3.6
Net Duration Gap		0.2		0.5

The estimated durations included in the table above are derived from models that are dependent on inputs and assumptions provided by third parties as well as by our investment team and, accordingly, actual results could differ materially from these estimates. In addition, different models could generate materially different estimates using similar inputs and assumptions. Management uses judgment to address the limitations and weaknesses inherent in model calculations as it seeks to balance the protection of book value with the generation of attractive returns. For example, we typically map lower loan balance and HARP securities to proxy securities within our models in order to derive durations and convexities that management believes are more consistent with how the prices of these securities would perform over larger interest rate movements. Other market participants could make materially different assumptions with respect to these and other judgments. Please also refer to the supplemental slide at the end of this presentation and our related disclosures in our 10-Ks and 10-Qs for a more complete discussion of duration (interest rate risk).

1. Fixed rate securities exclude securities from consolidated structured transactions
2. CMO balance includes interest-only, inverse interest-only and principal-only securities and consolidated structured transactions, net of consolidated other debt
3. Total liability and hedge duration is expressed in asset units

NAV SENSITIVITY TO RATES AND MBS SPREADS

BOTH CHANGES IN INTEREST RATES AND CHANGES TO MBS SPREADS RELATIVE TO TREASURY AND SWAP RATES CAN IMPACT THE MARKET VALUE OF OUR EQUITY

◆ Interest Rate Sensitivity

- ✓ Interest rate sensitivity is the sensitivity of our assets to changes in interest rates
 - The duration of a mortgage changes with interest rates and tends to increase when rates rise and decrease when rates fall
 - This “negative convexity” generally increases the interest rate exposure of a mortgage portfolio over what would be indicated by just our duration gap alone
- ✓ The estimated change in the market value of our asset portfolio, net of hedges, incorporates the dual effects of both duration and convexity and assumes no portfolio rebalancing actions taken

Interest Rate Sensitivity ¹ As of Mar 31, 2015 (based on instantaneous parallel shift in interest rates)		
Interest Rate Shock (bps)	Estimated Change in Portfolio Market Value ²	Estimated Change as a % of NAV ³
-100	-1.0%	-7.1%
-50	-0.1%	-1.0%
+50	-0.4%	-2.6%
+100	-1.0%	-7.6%

◆ MBS Spread Sensitivity (“Basis Risk”)

- ✓ The MBS spread sensitivity is the sensitivity of our assets to changes in MBS spreads
- ✓ Our estimated spread sensitivity is based on model predictions and assumes a spread duration of 4.6 years, which is based on interest rates and MBS prices as of Mar 31, 2015
- ✓ The spread sensitivity is also sensitive to interest rates and increases as interest rates rise and prepayments slow

MBS Spread Sensitivity (“Basis Risk”) ¹ As of Mar 31, 2015		
MBS Spread Shock (bps)	Estimated Change in Portfolio Market Value ²	Estimated Change as a % of NAV ³
-25	1.3%	9%
-10	0.5%	4%
+10	-0.5%	-4%
+25	-1.3%	-9%

1. Interest rate and MBS spread sensitivity are derived from models that are dependent on inputs and assumptions provided by third parties as well as by our investment team and, accordingly, actual results could differ materially from these estimates. Please also refer to the supplemental slide at the end of this presentation entitled “Duration Gap” for additional information

2. Estimated dollar change in value expressed as a percentage of the total market value of “at risk” assets

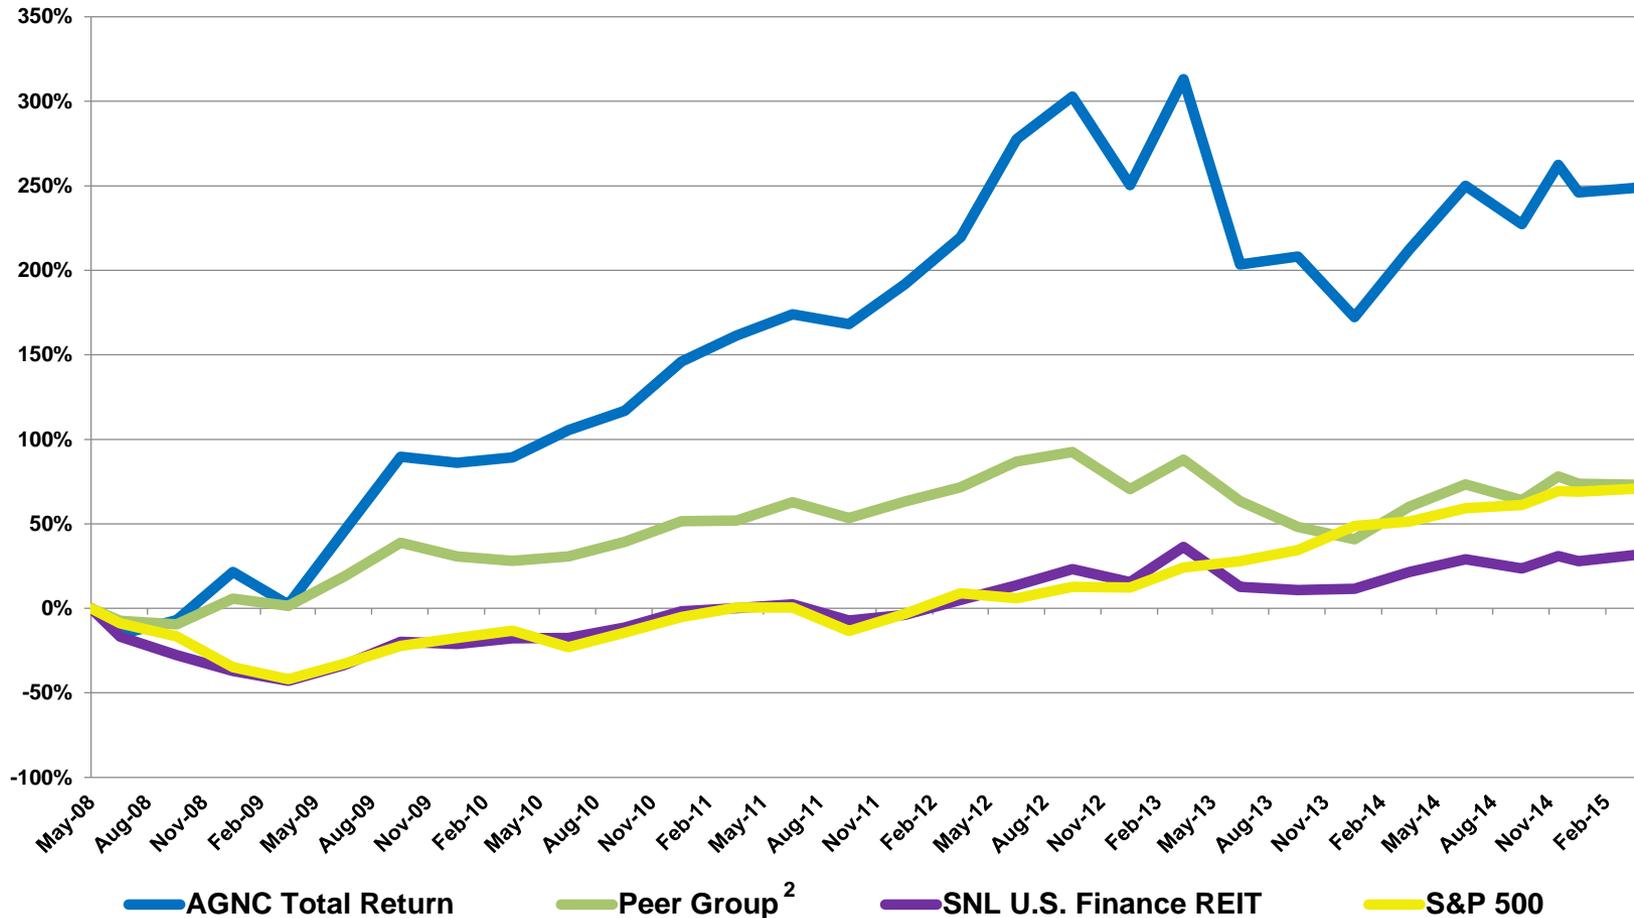

3. Estimated change as a percentage of NAV incorporates the impact of leverage

STOCK PERFORMANCE

AGNC HISTORICAL PRICE TO BOOK MULTIPLE

SUPPLEMENTAL INFORMATION

DURATION GAP

- ◆ **The duration of an asset or liability measures how much its price is expected to change if interest rates move in a parallel manner**
 - ✓ For example, an instrument with a 1 year duration is expected to change 1% in price for a 100 bps move in rates
- ◆ **Duration gap is a measure of the difference in the interest rate exposure, or estimated price sensitivity, of our assets and our liabilities (including hedges)**
 - ✓ It is calculated using relatively complex models and different models can produce substantially different results. Furthermore, the actual duration of both assets and liabilities (including hedges) may differ materially from the model estimates
 - ✓ Duration and convexity calculations generally assume all rates move in a parallel fashion (2 yr rates, 10 yr rates, swap rates, treasury rates etc.) and this is typically not the case. As such, these calculations do not measure the “basis risk” or yield curve exposure, embedded in these positions
 - ✓ Higher leverage increases the exposure of our book value (or equity) to a given duration gap
- ◆ **The duration of mortgage assets also changes as interest rates move. The duration generally extends when interest rates rise and contracts when interest rates fall. This is called “negative convexity” and is generally driven by changes in prepayment expectations, which have historically been correlated with interest rates. Interest rate caps embedded in ARM securities also increase negative convexity**
 - ✓ Negative convexity generally increases the interest rate exposure of a mortgage portfolio significantly over what would be indicated by the duration gap alone
- ◆ **AGNC uses a risk management system and models provided by Blackrock Solutions to generate these calculations and as a tool for helping us to measure other exposures, including exposure to larger interest rate moves and yield curve changes**
 - ✓ Base models, settings and market inputs are provided by Blackrock
 - ✓ Blackrock periodically adjusts these models as new information becomes available
 - ✓ AGNC management makes adjustments to the Blackrock model for certain securities as needed
 - ✓ Please refer to our most recent Form 10-K and 10-Q filed with the SEC for additional information on risk measures
- ◆ **The inputs and results from these models are not audited by our independent auditors**

USE OF NON-GAAP FINANCIAL INFORMATION

In addition to the results presented in accordance with GAAP, our results of operations discussed within this presentation include certain non-GAAP financial information, including “adjusted net interest expense” (defined as interest expense plus the periodic interest rate costs of our interest rate swaps reported in gain (loss) on derivatives and other securities, net in our consolidated statements of comprehensive income), “net spread and dollar roll income” (defined as interest income, TBA dollar roll income and dividends from REIT equity securities, net of adjusted net interest expense and operating expenses) and “estimated taxable income” and certain financial metrics derived from non-GAAP information, such as “cost of funds” and “net interest rate spread.”

By providing users of our financial information with such measures in addition to the related GAAP measures, we believe it gives users greater transparency into the information used by our management in its financial and operational decision-making and that it is meaningful information to consider related to: (i) the economic costs of financing our investment portfolio inclusive of interest rate swaps used to economically hedge against fluctuations in our borrowing costs, (ii) in the case of net spread and dollar roll income, our current financial performance without the effects of certain transactions that are not necessarily indicative of our current investment portfolio and operations, and (iii) in the case of estimated taxable income, information that is directly related to the amount of dividends we are required to distribute in order to maintain our REIT qualification status. However, because such measures are incomplete measures of our financial performance and involve differences from results computed in accordance with GAAP, they should be considered as supplementary to, and not as a substitute for, our results computed in accordance with GAAP. In addition, because not all companies use identical calculations, our presentation of such non-GAAP measures may not be comparable to other similarly-titled measures of other companies. Furthermore, estimated taxable income can include certain information that is subject to potential adjustments up to the time of filing our income tax returns, which occurs after the end of our fiscal year.

A reconciliation of GAAP net interest income to non-GAAP net spread and dollar roll income and a reconciliation of GAAP net income to non-GAAP estimated taxable income is included in this presentation.
